Good news is, you'll never find an over-sulphured organic wine, as maximum permitted levels are set lower than for conventional by some 25-50% depending on residual sugar levels.

Organic wines come from grapes grown without synthetic pesticides, herbicides, fungicides or chemical fertilisers. This keeps them free from all those man-made toxins that find their way into the food chain, and eventually into you, and also allows for wildlife to flourish.

All our wines are suitable for vegetarians.
